

## Choosing the Right Specialist for ACL Rupture in the Young Athlete

BY DR. AL DESIMONE

**ANTERIOR CRUCIATE LIGAMENT (ACL) RUPTURES** remain one of the most devastating injuries to the young competitive athlete. The ACL is the major supporting ligament within the knee joint providing stability to the knee during running, cutting and twisting sports. Though a traumatic collision with another athlete can cause a rupture to the ACL, a sudden alteration in speed and/or change in direction can also predispose an athlete to this injury.

The athlete will often describe a loud popping sensation within the knee joint and experience severe pain, swelling and weakness combined with an inability to ambulate. Diagnosis is usually made by obtaining a proper history of injury and by performing a thorough clinical examination of the involved knee. X-rays and MRIs are extremely beneficial during this evaluation and will often help rule-out concomitant injuries to the adjacent ligaments, menisci and/or cartilage.

The goal of treatment is to return the athlete back to his or her prior level of activity, including competitive sports. Rarely, one may consider conservative/non-operative treatment for those patients that are extremely sedentary and inactive in athletics. In this incidence, treatment may include rehabilitation, bracing and restriction to certain activities. For those individuals who are competitive athletes and participate in high-demand twisting sports, surgical ACL reconstruction is the treatment of choice.

Over the last several years, I have seen numerous patients with surgical failures from prior ACL reconstructions that have been referred to my office for further consultation and revision surgery. Having performed over 1,700 Anterior Cruciate Ligament reconstructions and over 200 revision surgical procedures, I remain convinced that this procedure is extremely technical and should be treated with state-of-the-art surgical technique and attention to detail. Though re-injury may be a common cause of failure subsequent to ACL reconstruction, technique related failures are commonly seen and can often occur from improper graft selection, tunnel placement, graft tensioning, and/or methods of fixation. Timing of surgery and proper postoperative instructions, including return to athletics, also play a significant role in prevention of re-injury. In concordance with the literature barring any anatomical or growth related considerations, I prefer to utilize bone-patella tendon-bone autograft for the young, high-demand athlete.

Treatment of an Anterior Cruciate Ligament rupture continues to be a challenging problem for the high school, collegiate and community athletes. It is imperative that young individuals (and parents) understand the importance of pursuing treatment by an experienced surgeon, preferably with a subspecialty interest in knee ligament reconstruction. Failure to do so may predispose an athlete to additional surgery and prevent return to sports in a timely manner.

Al DeSimone, MD, is a Board Certified Orthopedic Surgeon. He is Sports Medicine Fellowship Trained in Shoulder and Knee Ligament Reconstructive Surgery. Dr. DeSimone is a partner in the Sports Medicine Associates of South Florida P.A. He practices at the South Florida Institute of Sports Medicine at 1600 Town Center Blvd., Suite C. For more information or to schedule an appointment, call (954) 389-5900.

Family Funeral Care  
Lighting The Way For Three Generations

*The holidays may be especially difficult after experiencing the loss of a loved one. What is usually seen as time of joyous memories can become extremely painful. As it has been for 3 generations, keeping the needs of our community in mind is important to us. The Boyd Panciera families and staff invite you to join us for two Special Holiday Support Events.*

### ❧ HOLIDAY PROGRAM & SERVICE OF REMEMBRANCE ❧

FRIDAY, DECEMBER 6, 2013

6:30pm · Registration and Refreshments

7pm · Program- Rev. Bob Sands, Certified grief recovery specialist; will speak on "how to deal with the stress of the holidays"

In closing, we will share in a special "CANDLE LIGHTING CEREMONY" in memory of your loved one

### ❧ TREE OF MEMORIES ❧

SUNDAY, DECEMBER 8, 2013

Anytime between 1 and 3pm make a lasting memorial for your loved one. The funeral home will provide the ornament for you to personalize. The ornament will hang on our tree throughout the Holiday Season, after the holidays the ornament will be returned to you as a lasting memory.

Both events will be held at  
**BOYD PANCIERA HOLLYWOOD CHAPEL**  
6400 Hollywood Blvd.

*Seating is limited so please call to reserve your seat.  
This is a free program for our families and community that we serve.*

To RSVP and for Additional Information please contact
